1. Project description		
Commodity / commodities: [Production in kt p.a, sales price mechanism, production costs, (indicative) cost curve pos grades available for certain applications]	ition, GHG / CO2 footprint compared to competitors / industry a	average, purity,
Project location: [Country, country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rating / not rated, land title, land ownership, land purchases and legacions are supported by the country rated b	es, geo coordinates of project site(s), project footprint (total m²)	)]
Project maturity: [Scoping Study / Preliminary Economic Assessment (PEA); Pre-Feasibility-Study (PFS), De Design (FEED)]	finitive Feasibility Study (DFS), Bankability Feasibility Study (BF	FS), Front-End Engineering

Project partners: [Sponsors (specify relevant industry experience), raw material suppliers (processing and recycling projects), finished product offtakers, core equipment suppliers, EPC(s), project operator(s)]
2. Project construction / operation
In case of mining
Mining method: [Open pit / underground / other]
Applicable mining code: [JORC, NI43-101, PERC, etc.]
Resource status: [Resources, reserves (in kt)]
Life of mine: [Static in years, "tail"]
In case of mining / processing / recycling
Construction concept: [EPC / EPCM, management of interface and non-performance risks, track record contractor(s) / equipment supplier(s) / sponsor(s), maturity of process technology, construction period]

4. Infrastructure, technical, managem	ent, environmental & social	
Infrastructure: [Roads, railways, ports, incl. associated infrastructure that mining sites, power generation, port facilities, waste dump	: is not part of the project but needed for the project being vio os, etc.]	able, e.g. transmission lines, access roads, borrow pits,
Water: [Scarce / dewatering, water treatment plant, processing fa	cilities, tailings / waste / emissions management and other e	environmental aspects]
Energy: [Energy demand, project solution / grid energy / renewable etc.]	e (share) / energy mix, transmission lines, substations, connec	tion arrangement in place, LT offtake and energy price,

Process flow sheet: [If available, proven industrial-scale application, IP solved, scale-up risk & vs. largest existing plant, decommissioning and closure planning]
Management setup: [General Management: team size, experience, corporate governance Environmental and Social Management: system and certifications, capacities for environmental, occupational health and safety and social aspects]
Management track record: [In mining / processing / recycling, with juniors, in project development, other relevant industry experience]
[in mining / processing / recycling, with juniors, in project development, other relevant industry experience]
Workforce: [Technical: required workforce during construction / during operations, sufficient availability of skills / housing / transportation to and from project site E&S: occupational health & safety, working conditions and management of worker relationship, number of migrant workers, workers in the supply chain, protection of workforce (child labor, forced labor), workers accommodation, human rights risks, and accociated management plans]
Community:  [Community health and safety, security personnel, resettlement, expropriation, vulnerable people and indigenous peoples in the project area, cultrale heritage sites, and accociated management plans, description of adjacent communities, incl. distance]

Biodiversity: [Legally protected and internationally recognized areas in the project area, natural or critical habitats in the project area, deforestation and associated management plans]
5. Permitting Status
General set-up: [Timeline, local requirements, if pending: permitting requirements, etc.]
Mining permit / lease (if applicable): [Status / timeline, expiry: conditions precedent (CPs), conditions subsequent (CSs)]
Construction / operations permit: [Status / timeline, expiry: CPs, CSs]
Environmental permit(s): [Status / timeline, expiry: CPs, CSs / major challenges (e.g. major emissions, biodiversity, water topics, indigenous groups, resettlement, expropriation, any other time critical issues, stakeholder engagement, grievance mechanisms for workers and affected communities / people and accociated management plans, etc.]

Environmental studies, systems & plans: [E&S scoping, ESIA, ESMPs, RAP, BAP, etc.]	
E&S standards and positive impact: [Equator Principles / OECD Common Approaches, IFC Perfomance Standards, Green Loai (Copper Mark, IRMA, TSM), etc.]	n potential, further certifications intended
6. Offtake	
Name of potential German / EU offtaker(s): [If EU offtaker, please name German subsidiary, branch, etc.]	Status of potential offtake contract(s): [LoI, MoU, TS, Contract]
Envisaged volume: [Offtake p.a., share (%) of total production p.a.]	Envisaged tenor(s):
Design and price mechanism: [Take-or-pay / floor / cealing / index pricing]	Timeline:
